

To: Whom it may concern  
 From: Moore County Beekeepers Association, Carthage, NC  
**Subject: Swarm Catcher List**

9 January 2018

1. Honey bees are a vital part of our food supply. Honey bees pollinate crops and contribute to over a third of the food we eat. **Swarms are not normally aggressive.** If you see or hear about a ball of bees, called a swarm (see the photo below), please contact any of the below listed volunteer swarm catchers. If you know about a swarm, please tell the beekeeper the following details:

- a. Location of the swarm (address or nearest intersection and city).
- b. How high off the ground is the swarm and description of what the swarm is on/in?
- c. Is the swarm on a powerline? If so, have you contacted the emergency services / power company?
- d. What is the approximate size of the ball of bees?
- e. Is the swarm inside a wall, vehicle, or other structure?
- f. Who else has been notified about the swarm?
- g. What is your phone number, so the beekeeper can call you if necessary?

2. The Moore County Beekeepers Association swarm catch coordinator is Jay Farfalla at 910-949-3784; however, you may call any of the following beekeepers to attempt to remove the swarm. All of the listed beekeepers are willing to travel to other cities/areas to catch swarms.

Name	Phone Number	Email Address	City/area where they live near
Parks, Crystal Parks, Chad	Cell: 910-585-8424 Cell: 910-639-0183	crystalgparks@gmail.com	Eastwood/Carthage
