

THE FLAGSHIP GARDEN

All plants are native to North America in this Flagship Garden designed by Moore County Extension Master Gardener Volunteers. A Quick Response, QR, scan code is on every name tag. When QR code reader/camera on your cell phone is aimed at the code, a web page appears with information about each plant. The 3 sections of the garden have different themes. Unity of design is achieved by the frame of low evergreen border plants and repetition of arbors. There are 45 species of plants that provide food and shelter for a variety wildlife. Plants will flower in every season.
